PROFILE

Senior full stack engineer with 13 years of experience designing and delivering Java Spring Boot applications in financial, insurance and telecom services. Currently leading the architecture and end-to-end delivery of Azure cloud-based case management application at UBS, with prior microservices experience at iptiQ by Swiss Re and TX Group.

SKILLS

AI Engineering: Spring AI, LangChain, vector stores (pgvector, ChromaDB), prototype agentic assistant for case management tool.

Backend: Java (6/8/11/17/21), Kotlin, Spring Boot, Spring Data, Spring Security, Spring AI, RESTful APIs, microservices & service-oriented architectures.

Data & Streaming: PostgreSQL, MariaDB, Oracle, MSSQL, DynamoDB, Redis, Elasticsearch, Kafka, Avro, RabbitMQ.

Frontend: TypeScript, Angular, RxJS, HTML/CSS.

DevOps & Cloud: Docker, Kubernetes, Azure (current), AWS, Azure DevOps / GitHub Actions CI/CD, observability and monitoring.

Leadership: Architectural design, technical decision-making, code & PR reviews, mentoring junior engineers and interns, agile/Scrum facilitation (PSM I).

PROFESSIONAL EXPERIENCE

UBS — Zurich, Switzerland, Nov 2024 – Present

Senior Full Stack Engineer · Group Investigations Reporting & Case Management

Lead engineer on the Azure cloud-based application that powers the firm's Group Investigations and Reporting case management tool.

- Drove the architectural design and full-stack delivery of the platform end-to-end, owning technical decisions on the Java 21 / Spring Boot backend and the Angular front-end.
- Designed RESTful APIs and PostgreSQL data models supporting case-management workflows for a regulated, high-sensitivity domain.
- Led the platform migration from Java 11 / Angular 11 to Java 21 / Angular 18, ensuring compliance and aligning with vulnerability scanning.
- Established CI/CD on Gitlab and introduced automated testing (unit, integration).
- Earned a top 3 placement in internal GenAI capstone project competition by developing an agentic assistant for an internal case-management tool.
- Onboarded new joiners and interns by producing detailed documentation and performing live demos.

Tech Stack: Angular, Java 21, Spring Boot, PostgreSQL, Azure, Azure DevOps, Spring AI.

iptiQ by Swiss Re — Zurich, Switzerland, Apr 2021 – Oct 2024

Senior Software Engineer · Commissions & Technical Accounting

Built event-driven Kotlin / Spring Boot microservices powering payment plans, dunning, bookkeeping and broker commissioning across multiple insurance products.

- Designed and implemented an in-house technical accounting platform aimed at significantly reducing external costs.
- Designed and implemented legacy migration of the company's dunning reminders system, ensuring smooth cash flow through the timely collection of payments from customers.
- Drafted run-books and design documents for the team's core systems and processes
- Onboarded and coached new joiners.

Tech Stack: Kotlin, Spring Boot, Kafka, Avro, PostgreSQL, DynamoDB, Redis, Docker, Kubernetes, AWS.

TX Group · Tamedia — Zurich, Switzerland, Sep 2019 – Mar 2021

Senior Backend Engineer · Editorial CMS

My responsibilities included the design and implementation of the core functionalities of the company's in-house CMS. .

- Participated in the CMS legacy migration from Monolith to Microservices, aimed at reducing deployment times and resource usage.
- Built Java 11 / Spring Boot microservices integrating MariaDB, Elasticsearch and RabbitMQ for editorial workflows and asset search.
- Implemented WebSocket-based collaboration features for real-time multi-author editing.

Tech Stack: Java 11, Spring Boot microservices, MariaDB, Elasticsearch, RabbitMQ, WebSockets.

Upstream Systems — Athens, Greece, Sep 2015 – Aug 2019

Senior Software Engineer · Content Management Engine & Fraud Detection Platform

As a member in various teams throughout my career in Upstream, a Digital Marketing and Mobile Monetization player based in Athens, my responsibilities spanned from legacy migrations to designing and implementing new stand-alone applications.

- Extracted legacy Java 6 Monolith functionality into a separate service inside a Java 8 Microservices architecture, including seamless migration of configurations and transactional data..
- Designed and implemented the company's fraud detection platform with emphasis on scalability and high availability.

Tech Stack: Java 8, Spring Boot, PostgreSQL, Cassandra, Redis, RabbitMQ, JBoss.

Appart S.A. — Athens, Greece, May 2013 – Sep 2015

Junior Full Stack Engineer · Campaign Management

As a member of the Campaign Management team, I have participated in different projects and cooperated with various stakeholders from the world of Telecom Service Providers like Vodafone GR, Vodafone AL and Hellas On Line..

- Implemented high-availability campaign management system, handling real data of over a million subscribers.
- Built and maintained Java / Apache Wicket / CakePHP applications integrated with JBoss, MySQL, MongoDB and ActiveMQ.
- Built and maintained mediation system for Hellas OnLine (HOL) Music Club, a music track downloading platform for the subscribers of the 2nd larger Telecom Operator in Greece.

Tech Stack: Java 6, PHP, Javascript (jQuery), Jboss, CakePHP (OOPHP, MVC), Apache Wicket, Oracle, MySql, MongoDB, ActiveMQ.

EDUCATION

University of Patras — Polytechnic School, Sep 2004 – Mar 2012

Diploma in Electrical & Computer Engineering (5-year integrated MSc-equivalent).

Thesis: Software development for simulation of loudspeaker–enclosure systems (Prof. J. Mourjopoulos).

CERTIFICATIONS & CONTINUOUS LEARNING

- GenAI Enablement Program for Corporations — Infosys Wingspan (RAG, agentic patterns, vector DBs).
- Professional Scrum Master I (PSM I) — Scrum.org.
- Extreme Java 8 — Heinz Kabutz / JavaSpecialists (concurrency, lambdas, performance tuning).
- Neural Networks & Deep Learning · Improving Deep Neural Networks — DeepLearning.AI / Coursera.
- Advanced Data Structures in Java — UC San Diego / Coursera.
